

Environmental Policy

As one of the UK's leading waste management companies, Countrywide Waste Management Limited provides a full range of waste management solutions to commercial waste producers throughout the UK.

We are committed to the continual improvement of our environmental management, prevention of pollution, compliance with all environmental legislation and Duty of Care requirements and to helping our suppliers and clients in the minimisation of their environmental impacts.

As an ISO 14001 accredited company we recognise our responsibilities to the environment and are aware of the complete impact the waste management process has both on a national and regional basis. Our Environmental Management System provides a framework for the setting and reviewing of objectives and targets for the environment and the communication of these to all members of our organisation.

To help reduce this impact, we plan all our activities with the protection of the environment at the core of our business, and we endeavour to ensure there is a real drive to:-

- ↓ Engage local resource
- ↓ Source the supply chain within 20 miles of the site we are working on
- ↓ Ensure all waste is transferred to a waste recycling facility
- ↓ Review recycled and/or recovered products
- ↓ Look at carbon replenishment schemes
- ↓ Procure environmentally friendly products

When planning new facilities or services, we will identify and consider alternative waste management options, including the investigation and encouragement of waste minimisation and recycling of waste.

We continually work to maximise efficiencies and eliminate waste by providing full waste management services. This is through best practice process management, working with businesses and supply chain teams to provide alternative service options. The system is focused on achieving a high level of customer satisfaction reinforced by a commitment to continual improvement.

When placing work with subcontractors we take into account the intentions of that subcontractor, and will favour those contractors with the facilities to reuse or recycle waste materials.

We will ensure that all employees are aware of our Environmental Policy and the objectives of the policy, and are given sufficient training and resources to enable them to meet these objectives.

The Environmental Policy is reviewed on an annual basis by the directors of Countrywide Waste Management Limited.

Countrywide Waste Management Limited has a published Health & Safety Policy for its staff, visitors and operations and this will form part of the Environmental Policy and its review.
